

### **Information that must be provided in WPR's:**

1. Project Title
2. Your name, team member names
3. Week number and dates
4. Detailed individual work completed over the past week (schematics, analysis, test data, experiment setup, etc, that is, anything that may be directly copy-pasted into your final report). See the technical merits I'm after in the Final Reports folder's description.
5. Any other information required by your section Teaching Assistant
6. Individual work plan for next week
7. Appendix. **Provide the latest System Block Diagram (SBD)**, even if it was provided in the previous WPRs.

**Note:** *submission of WPR's is a requirement in this course*. If for some reason there isn't any work done over any week, still submit your WPR with a short description of the reason (tests, family emergencies, etc).

### **WPR GRADING:**

- 0 - missing report
- 1 - submitted, but either no information or the information provided didn't show much work
- 2 - completed work was reasonable

**Critical Note:** a score 2 doesn't mean an "A" or an excellent technical quality of the conducted work, it will just show that you did work hard during the week.
