

Project #	Project	# of Presenters
1	AI Circuit MCP	3
2	Battery Management System	2
3	E-Bike with a Smart BMS	1
4	EcoCAR Lane Centering Control	3
5	EcoCAR Sensor Fusion	2
6	Health Monitoring Smartwatch	3
7	Multimodal Autonomous Rover	2
8	Object Detection FPV Turret	3
9	Optical Coffee Bean Sorting with Robotic Arm	2
10	Plant Vision Smart Irrigation System	2
11	Real Time Smart Energy Management System	1
12	Reconnaissance Vehicle	3
13	S.A.M - Sorting Autonomous Machine	2
14	Safe EQ	3
15	Scouting Hexapod Robot	3
16	SIMPLE: ARM	2
17	Smart Power Management System	3
18	ASL ROBOTIC HAND	1
19	Tactile-Claw-Machine	1
20	Persistence of Vision Display	1
21	Hybrid Audio-Effects Processor	2
22	All-in-One Vitals Monitoring Device	2
23	Autonomous Car Simulator	3
24	Autonomous Delivery Drone System	1
25	Autonomous LAP Robot	2
26	Autonomous Organizing Car	3
27	Autonomous Security Robot	3
28	Badminton Trainer	3
29	Delivery AGV	3
30	Explosive Ordnance Disposal Robot	2
31	Gantry Crane Sorter	2
32	Hammerhead Autonomous Marine Rover	2
33	Regenerative Braking	3
34	Smart Charging System	1
35	STRIDE	1
36	The Automated Well Plate Filler	1
37	Underwater Vehicle Testbed	1
38	O.P.T.I.C Doorbell	1

3 Presenters	7 mins
2 Presenters	6 mins
1 Presenter	5 mins

General Rules:

1. Equal Participation

For teams of 2–3, presentation time must be distributed equally. Each member should speak for roughly the same duration and cover a meaningful part of the project. Uneven participation will affect individual grades.

2. Fast and Smooth Setup

Your slides must be ready and open within 30 seconds. Bring your file on a flash drive and use the classroom computer. Delays will count against your time and professionalism.

3. Strict Time Limit

Stay within the time limit. Going over time will result in a penalty; finishing slightly early is acceptable. Practice to ensure proper pacing.

4. No Reading from Slides

Slides are visual support, not a script. Do not read directly from slides; explain concepts in your own words. Reading reduces clarity and engagement.

5. Professional Delivery

Maintain eye contact, clear voice, and confident posture. Use appropriate technical language but explain key terms when needed.

Remember: You are presenting as an engineer to a professional audience.
